Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and EcoR V sites of the pCMVSPORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a division of Invitrogen.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    301 ACAGGGATTAGGTGCCAACTGGAGTCTTGGTGAAATGGGGATTATGATCAAGAACAGT

1st strand cDNA was primed with a Not1-oligo(dT) primer. Five prime
end enriched, double-strand cDNA was digested with Not I and cloned
into the Not I and ECGNV sites of the pCMVSPORT 6 vector. Library
was not normalized. Library was constructed by Life Technologies, a
division of Invitrogen.

This sequence belongs to sequence cluster 1912.r,
and it belongs to a clone representative of this cluster. For more
information about this cluster and the virtual cDNA, see
http://www.genoscope.cns.fr/cdna?e=CSODA005DC05QP1&c=1912.r.

Clone from S. Wiemann, Molecular Genome Analysis, German Cancer
Research Conter (DKPZ); Email s wiemann@kfz-heidelberg.de;
sequenced by BMPZ (Blomedical Research Center at the
Heinrich-Heine-University, Desseldorf/Germany) within the CDNA
sequencing consortium of the German Genome Project. This clone
(DKPZp313M1333) is available at the RZPD in Berlin. Please contact
the RZPD: Reseourcenzentrum, Heubnerweg 6, 14059
Berlin-Charlottenburg, GERWANY; Email: clone@rzpd.de Further
information about the clone and the sequencing project is available
at http://mips.gsf.de/proj/CDNA/.
